* Develop community renewable energy projects, electric community bus, charging stations, Independent power source for Korumburra - Solar farm, wind farm etc

Open pollinated seed bank community

New and improved V-Line stop with facilities, shelter, and car parking

Community Feedback...

Sustainability of the Community (2)

* A local Korumburra emergency plan that is known by the members of the community that includes:

A planned designated meeting place in Korumburra during a disaster & emergency event that has the required alternative power source and services to the community - the meeting place is well publicised before an event

Improved manual (non-internet) communication of disaster & emergency event information

An emergency checklist delivered to all households, that lists emergency services, contacts, places that can provide phone recharging, meals, showers, vehicle support, suggested essential household items to have on hand etc all required in the event of some form of disaster in our area

Improved support & care for vulnerable people during disaster & emergency events. Clarify disaster plans for most vulnerable citizens aged care Carinya, Hillside, Alchera and Korumburra Hospital

Better access to the following items during disaster & emergency events - cash; gas; fuel; ice & generator
